D39-23 SPECIFICATIONS

ENGINE

Model.................................................. Komatsu SAA4D95LE-6*
Type.................................................. 4-cycle, water-cooled, direct injection
Aspiration.............................................. Variable flow turbocharged, air-to-air aftercooled
Number of cylinders.................................. 4
Bore x stroke........................................... 95 mm x 115 mm 3.75” x 4.52”
Piston displacement................................. 3.26 ltr 199 in³
Governor.................................................. All-speed, electronic

Horsepower......................................... Gross 79 kW 107 HP
SAE J1995.................................................. 78 kW 105 HP
ISO 9249 / SAE J1349.................................. 78 kW 105 HP
Rated rpm............................................... 2200 rpm
Fan drive type......................................... Variable flow turbocharged, air-to-air aftercooled

Lubrication system
 Method.................................................. Gear pump, forced lubrication
 Filter...................................................... Full-flow

*EPA Tier 4 Interim and EU stage 3B emissions certified

HYDROSTATIC TRANSMISSION

Dual-path, hydrostatic transmission provides infinite speed changes up to 5.3 km/h 8.5 mph. The variable capacity travel motors allow the operator to select the optimum speed to match specific jobs. Travel control lock lever and neutral switch.

<table>
<thead>
<tr>

</table>

*Quick shift speeds are adjustable in the monitor.

STEERING SYSTEM

Palm Command Control System (PCCS) joystick control for all directional movements. Pushing the joystick forward results in forward machine travel, while pulling it rearward reverses the machine. Simply tilt the joystick to the left or right to make a turn. Tilting the joystick fully to the left or right activates counter-rotation.

Hydrostatic Transmission (HST) provides smooth powerful turns. Fully electronic control enables smooth control that can be adjusted in the monitor. The PCCS utilizes shift buttons to increase and decrease speed.

Minimum turning radius*
D39EX-23........................................ 2.2 m 87”
D39PX-23........................................ 2.4 m 94”

*As measured by track marks on the ground at pivot turn.

UNDERCARRIAGE

Suspension............................................ Rigid type
Track roller frame.................................. Monocoque, large section, durable construction

Rollers and idlers................................... Lubricated track rollers
Sealed and lubricated track
Track tension is easily adjusted with grease gun.

*Including hitch
STANDARD EQUIPMENT FOR BASE MACHINE*

- Air cleaner, double element with caution lamp on monitor
- Alternator, 60 ampere/24V
- Backup alarm
- Batteries, 92 Ah/2 x 12V
- Battery disconnect switch
- Blade lift cylinders
- Color monitor, LCD
- Decelerator pedal (single pedal)
- Engine hood
- Engine intake centrifugal precleaner
- Engine, swing open side cover
- Engine shutdown secondary switch
- Front pull hook
- Fuel prefilter (10 micron) and fuel filter (2 micron)
- Grease gun holder
- High mount foot rests
- Horn, warning
- Hydraulic driven radiator cooling fan with reverse clean mode
- KOMTRAX® Level 4
- Komatsu Diesel Oxidation Catalyst (KDOC)
- Locks, filler caps and covers
- Muffler with curved exhaust pipe
- Radiator mask, heavy-duty, swing up
- Radiator reserve tank
- ROPS cab**
  - Air conditioner
  - Cab accessories
    - 12V power supply (2 ports)
    - Cup holder
    - Rearview mirror
    - Rear view monitoring (1 camera)
    - AM/FM Radio w/remote AUX plug (3.5 mm)
    - 72 dB
- Work lights
  - 3 front, cab mounted
  - 2 rear, cab mounted
- Seat, air suspension, fabric, heated low back, headrest
- Seat belt, 76 mm 3", retractable
- Seat belt indicator
- Sealed electrical connectors
- Side by side rear mounted cooling package
- Starting motor, 4.5 kW/24V
- Steering system, hydrostatic
- Track roller guards, center and end sections
- Track shoe assembly
  - Sealed and lubricated
  - 510 mm 20" single grouser shoe (EX)
  - 635 mm 25" single grouser shoe (PX)
- Transmission with Variable and Customizable Quickshift
- Transmission, hydrostatic
- Underguards, heavy duty
- Engine
- Transmission
- Variable flow turbocharger
- Water separator

* Dozer assembly and rear mounted equipment are not included in base machine standard equipment
** Cab meets ROPS and FOPS Level 2 standards

OPTIONAL EQUIPMENT

- Dozer assembly
- Hitch
- Hydraulics for rear equipment
- Track roller guard, full length

Multi-shank ripper (for D39EX)

- Weight................................. 470 kg 1,036 lb
- Beam length......................... 1569 mm 62"
- Maximum digging depth............. 389 mm 15"
- Maximum lift above ground........ 336 mm 13"
- Number of shanks.................... 3

ALLIED MANUFACTURER’S ATTACHMENTS (SHIPPED LOOSE)

- Guarding - Komatsu (Ken Garner)
  - Front sweeps 265 kg 584 lb
  - Hinged cab side screens 44 kg 97 lb
  - Hinged cab rear screen 43 kg 95 lb
  - Rear A/C guard (requires front sweep) 61 kg 134 lb
  - Poly panel door inserts 41 kg 91 lb

- Hydraulic winch - Allied H4AT 685 kg 1,510 lb

- 700 mm 27.5" grouser (PX)(PLUS)
- 510 mm 20" grouser (EX)(Conventional)
- 510 mm 20" grouser (EX)(Conventional)

WALK-AROUND

Photos may include optional equipment.
D39-23 Tier 4 Interim Engine

OUTSTANDING PRODUCTIVITY & FUEL ECONOMY

New Power and Economy modes:
Full power when you need it and Economy mode to save fuel when you don’t.

New engine and hydrostatic pump control technology improves operational efficiency and lowers fuel consumption.

SAA4D95LE-6 variable flow turbocharged and aftercooled 3.26 liter diesel engine provides excellent fuel economy. This engine is EPA Tier 4 Interim and EU Stage 3B emissions certified.

Variable Flow Turbocharger uses a simple valve to provide optimum air flow under all speed and load conditions.

Komatsu Diesel Oxidation Catalyst reduces particulate matter using passive regeneration 100% of the time. No active or manual regeneration is required.

Rear view monitoring system (standard)

Advanced diagnostic system continuously monitors machine operation and vital systems to identify machine issues and assist with troubleshooting.

Single pedal can act as either brake or decelerator

Improved Cooling System
- Electronically controlled hydraulically driven fan is manually reversible
- Gas assisted lift cylinders on radiator cover opens for easy cleaning
- Side-by-side coolers with increased cooling capacity

Integrated ROPS cab features:
- Large, quiet, and pressurized cab
- Excellent visibility with integrated ROPS structure
- New heated air-ride seat with 15% higher capacity (standard)
- Standard aux jack and (2) 12V power converters

Improved durability
- Heavy-plate steel used for nose and tanks
- Dozer frame with full steel castings
- Komatsu designed and manufactured components

Self-adjusting idler support provides constant and even idler tension, reducing vibration and increasing undercarriage life.

Parallel Link Undercarriage System (PLUS) provides up to double the wear life and lower repair & maintenance costs.

Komtrax equipped machines can send location, SMR and operation maps to a secure website utilizing wireless technology. Machines also relay error codes, cautions, maintenance items, fuel levels, and much more.

Large color monitor
- Easy-to-read and use large 7” high-resolution multi-color monitor
- ECO guidance
- On-board diagnostics

* Compared to D39-22 model
Unrivaled Blade Visibility
The D39EX/PX-23 incorporates Komatsu’s super-slant nose design. Komatsu’s innovative design provides excellent blade visibility for improved machine control and increased efficiency and productivity.
Have been missing!
PRODUCTIVITY & ECOLOGY FEATURES

Environment-Friendly Engine
The Komatsu SAA4D95LE-6 engine is EPA Tier 4 Interim and EU Stage 3B emissions certified and provides exceptional performance while reducing fuel consumption. Based on Komatsu proprietary technologies developed over many years, this new diesel engine reduces exhaust gas particulate matter (PM) by more than 90% and nitrogen oxide (NOx) by more than 45%, compared to Tier 3 levels. Through the in-house development and production of engines, electronics, and hydraulic components, Komatsu has achieved great advancements in technology providing high levels of performance and efficiency in virtually all applications.

Advanced Electronic Control System
The engine control system has been upgraded to effectively manage a variety of parameters such as the air flow rate, EGR gas flow rate, fuel injection parameters, and aftertreatment functions. The new control system also provides enhanced diagnostic capabilities.

Cooled Exhaust Gas Recirculation (EGR)
Cooled EGR, a technology that has been well proven in Komatsu Tier 3 engines, reduces NOx emission to meet Tier 4 levels. The EGR system has increased capacity and uses larger and more robust components to ensure reliability for demanding work conditions.

Newly designed Variable Flow Turbocharger (VFT)
A newly designed variable flow turbocharger features simple and reliable technology that varies the intake airflow. Exhaust turbine wheel speed is controlled by flow control valve and it enables to deliver optimum air quantity to the engine combustion chamber under all speed and load conditions. The result is cleaner exhaust gas while maintaining power and performance.

Redesigned combustion chamber
The combustion chamber has a new shape designed to improve combustion and further reduce NOx, PM, fuel consumption, and noise levels.

Closed Crankcase Ventilation (CCV)
Crankcase emissions (blow-by gas) are passed through a CCV filter. The CCV filter traps oil mist which is returned back to the crankcase while the filtered gas is returned to the air intake.

New 16 valve cylinder head
4 valves per cylinder maximizes air intake quantity and optimizes fuel combustion.

High efficiency fuel filter
A new high efficiency fuel filter improves fuel system reliability. The dual-type filter offers twice the filtration capacity.
New HST Technology
The D39-23 incorporates new proprietary engine and hydrostatic transmission pump control technology to improve operational efficiency and reduce fuel consumption to levels lower than a conventional HST control system can obtain. This Komatsu exclusive feature reduces fuel consumption by up to 10% in P mode in demanding working conditions and up to 20% in E mode under lighter load conditions as compared to the prior model.

Powerful turns under various work conditions are achieved with the new HST transmission, even under load. Counter-rotation is available for minimum turning radius, providing excellent maneuverability in tight spots.

Variable and New Customizable Quickshift Modes
The D39-23 offers two gearshift modes: Variable and the new Customizable Quick shift. Variable shift mode provides 20 incremental speed settings for the operator, while the new Customizable Quick shift provides 3 speed settings; all can be adjusted in the monitor to obtain the right speed for different operator preferences.

Single Pedal (Decelerator/Brake Pedal) to be operated for Speed Control, during Operation
Machine operation becomes simple because brake function has been integrated into decelerator pedal. Machine moving speed including/excluding engine speed can be controllable by using only one pedal of decelerator/brake pedal. Operation of pedal function can be changed by the mode selector switch.

Decelerator mode
The pedal can decelerate engine RPMs and vehicle travel speed. Normally can be used for all applications.

Brake mode
The pedal can decelerate vehicle travel speed, keeping high engine revolution. This mode can be helpful to keep work equipment controllability and/or force, even during braking.
Komatsu Diesel Oxidation Catalyst (KDOC)

The new Komatsu Diesel Oxidation Catalyst (KDOC) has an integrated design that does not interfere with daily operation. This smart and simplified system removes soot using 100% "passive regeneration" without the need for a Diesel Particulate Filter. The KDOC is a simple design and does not have a scheduled service interval like a DPF and is designed for long life with no scheduled maintenance required. For owners, this means lower Owning and Operating costs due to less complexity and truly seamless operation for the operator.

Selectable Working Mode

Working mode E is for general dozing applications with adequate speed and power while reducing fuel consumption and CO₂. Working mode P is aimed at powerful operation and maximum production. The working mode is easily switched on the monitor panel, depending on the work at hand.

- E mode (Economy mode)
  With E mode, the engine outputs enough power for most general dozing applications without delivering unnecessary power. This mode allows for energy-saving operation and is suitable for work on ground where the machine may experience shoe slip or applications not requiring large power such as downhill dozing, leveling and light-load work.

- P mode (Power mode)
  With P mode, the engine outputs its full power, allowing the machine to perform large production, heavy-load, or uphill work.
Other Features

Power Angle Tilt (PAT) Dozer With Adjustable Pitch

A Power Angle Tilt dozer blade with highly durable box-structure frame is available for the EX and PX machines. The hydraulic blade tilt and angling functions and manually adjustable blade pitch expand versatility and productivity in a variety of applications. This PAT dozer assembly is tested to stringent test standards.

Secondary Engine Shutdown Switch

A new secondary switch has been added, at the side of the front console, to shut down the engine.

ECO Guidance

In order to support optimum operation, the following 4 recommendations are displayed to improve fuel saving operation:

1) Avoid Excessive Engine Idling
2) Use Economy Mode to Save Fuel
3) Avoid Hydraulic Relief Pressure
4) Avoid Overload

The operator can access the ECO guidance menu to check the Operation Records, Eco Guidance Records, and Average Fuel Consumption logs.

Rear View Monitoring System

On the large LCD color monitor, the operator can view, through one camera, areas directly behind the machine. This camera can be synchronized with reverse operation.
**New Integrated ROPS Cab**
A new design cab; wider, deeper and taller, is integrated with the ROPS. High rigidity and superb sealing performance greatly reduce noise and vibration for the operator and minimize dust entering the cab. Larger glass area improves visibility of the blade, sides, and rear of the machine. Cab meets ROPS and FOPS Level 2 standards.

**Palm Command Control System (PCCS) Travel Joystick**
Palm command travel joystick provides the operator with a relaxed posture and superb fine control. Transmission shifting is simplified with thumb push buttons.

**Electronic Controlled Hydraulic System (EPC) Blade Control Joystick**
Blade control joystick uses the EPC valve and joystick, similar to the travel control joystick. EPC control combined with the highly reliable Komatsu hydraulic system enables superb fine control. A switch is now used to angle the PAT blade. A button to activate float is also provided.

**New Air Suspension Seat**
A new higher capacity low-back heated seat with headrest is now standard. The new seat has many adjustments to accommodate different operators comfortably.

**Auxiliary Input Jack**
By connecting an auxiliary device to this plug input, the operator can hear sound through the speakers installed in the cab.

**Large Multi-Lingual LCD Color Monitor**
A large user-friendly color monitor enables accurate and smooth work. Excellent screen visibility is achieved by the use of a TFT liquid crystal display that can easily be read at various angles and lighting conditions. Simple and easy to operate switches. Function keys facilitate multi-function operations. Data can be displayed in 25 languages for local customization.
Planned maintenance is the best way to ensure long service life from your equipment. That's why Komatsu designed the D39 with conveniently located maintenance points to make necessary inspections and maintenance quick and easy.

Hydraulically-Driven Swing-up Fan
The D39-23 utilizes a swing-up fan with a gas strut-assisted lift locking system to provide easy access to the (side-by-side) radiator, oil cooler, and charge air cooler. The swing-up feature makes it easier to access cooling cores. The hydraulic fan can rotate in the reverse direction to help remove debris from cooler cores.

Daily Checks
All daily checks can be performed efficiently from the left side of the machine.

Parallel Link Undercarriage System (PLUS)
Komatsu’s new Parallel Link Undercarriage System (PLUS) provides less downtime plus longer wear life with up to 40% lower undercarriage maintenance costs. Rotating bushings eliminate the cost and downtime for bushing turns, and strengthened rollers and links increase wear life up to two times. With PLUS, individual links can be replaced with common track tools.

Self-Adjusting Idler Support
The self-adjusting idler support provides constant and even tension on idler guide plates reducing noise and vibration and increasing undercarriage life.

Modular Design
One of the design goals behind the creation of the D39 was to manufacture a more durable machine. This was achieved by reducing component complexity and using a strong modular design for increased serviceability and durability. Steel castings reduce the number of welds, improving C-frame rigidity and strength.

Robust Guarding And Attachments
Komatsu offers a full guarding package to help protect your machine and operator in severe applications.
Komatsu CARE – Complimentary Scheduled Maintenance

- PM services for the earlier of 3 years / 2000 hours
- Performed by factory certified technicians
- Komatsu Genuine parts and fluids
- Significantly lowers your cost of ownership while maintaining high uptime and reliability
- Increases resale value and provides detailed maintenance records

KOMTRAX EQUIPMENT MONITORING

✅ WHAT
- KOMTRAX is Komatsu’s remote equipment monitoring and management system
- KOMTRAX continuously monitors and records machine health and operational data
- Information such as fuel consumption, utilization, and a detailed history aids in making repair or replacement decisions

✅ WHEN
- Know when your machines are running or idling and make decisions that will improve your fleet utilization
- Detailed movement records ensure you know when and where your equipment is moved
- Up to date records allow you to know when maintenance was done and help you plan for future maintenance needs

✅ WHERE
- KOMTRAX data can be accessed virtually anywhere through your computer, the web or your smart phone
- Automatic alerts keep fleet managers up to date on the latest machine notifications

✅ WHY
- Knowledge is power - make informed decisions to manage your fleet better
- Knowing your idle time and fuel consumption will help maximize your machine efficiency
- Take control of your equipment - any time, anywhere
